

TS3 Color Touchscreen

Product Brief

Russound's new TS3 Touchscreen provides control of music and video sources through a simple yet feature-rich interface. Its elegant industrial design and color options complement any décor while the optional DTS-1 stand enables placement anywhere in the home — night-stands, counters, or desks.

The wide-angle LCD panel is easy to read and the soft-key buttons are simple to use. The system's status is always in view and in real time, including the current source selection, selected AM/FM radio station or XM/SIRIUS channel, and volume level.

The TS3 also provides one-touch access to favorite CDs, DVDs, and iPod play lists, as well as custom presets, and

music themes for a personalized touch. It displays key source metadata on-screen, such as playlist, theme, channel, artist, album, song title, and RDS information for supported sources.

The TS3 is designed for use with all of Russound's latest products including sources and C-Series Multiroom Controllers. It mounts in a 2-Gang electrical work box and connects with a single standard CAT-5 cable.

While compact in size, it's big on features. The TS3 is an attractive and powerful user interface option designed for control of any C-Series Multiroom A/V system.

Specifications
